EDUCATION

University of Illinois at Urbana-Champaign

B.S. Engineering Physics, Minor in Computer Science

- Concentration: Computational Physics

Champaign, IL

Aug. 2019 – May 2023

WORK EXPERIENCE

Full-Stack Software Engineer

C3.ai

September 2024 – January 2026

Redwood City, CA

- Led technical design of Total Force Planning Process (TFPP) application, authoring technical specs, defining data models, and designing frontend architecture for a U.S. Marine Corps (USMC) personnel planning platform using React, TypeScript, and C3 Platform
- Owned end-to-end development of TFPP, leading a 3-engineer team from approved specs through production deployment, resulting in estimated annual cost savings of \$200M
- Served as lead developer for USMC Personnel Forecasting Tool (PFT), designing extensible architecture and implementing scalable workflows for long-term development
- Designed a data aggregation pipeline compressing up to 72M personnel records to 5,000 planning-ready entries, enabling real-time forecasting at scale

Software Engineer

Sony Interactive Entertainment - PlayStation

June 2023 – May 2024

San Francisco, CA

- Owned AWS Lambda and Slack integration for an internal LLM-powered support chatbot, automating responses to engineering support requests and reducing interruptions by 25%
- Built and maintained CI/CD pipelines using Jenkins, integrating RBAC, Helm chart generation, and ServiceNow workflows, reducing deployment time by up to 30%
- Devised and built dynamic Helm chart generation from schema-driven configurations, standardizing Kubernetes deployments across teams
- Supported production systems as an on-call engineer, managing engineering support requests, Kubernetes clusters, ArgoCD deployments, and operational incidents

Software Engineer Intern

Sony Interactive Entertainment - PlayStation

May 2022 – Aug. 2022

San Francisco, CA

- Built a monitoring system using Python for resource-intensive Kubernetes applications in production clusters
- Utilized Jenkins (Groovy) to create internal tooling that notifies senior engineers of failed Kubernetes deployments, improving time to resolve by 20%

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, HTML/CSS, Groovy, SQL, C++

Web Technologies: React, React Native, Node.js

Cloud/DevOps: AWS (EKS, Lambda, ECR), Kubernetes, Helm, Jenkins, ArgoCD, Prometheus

Databases/Tools: MongoDB, Git, Linux

PROJECTS

Tally AI | *React 19, TypeScript, FastAPI, Supabase, OpenAI API* | [Live](#) | [GitHub](#)

- Built a full-stack personal finance app with expense/income tracking, rule-based auto-categorization with AI fallback, per-category budgets, and savings goals with priority cascade
- Designed an AI layer spanning every core workflow — expense parsing, receipt OCR, CSV categorization, dashboard insights, anomaly explanation, goal coaching, and a LangGraph agent with 10 financial tools
- Implemented z-score outlier detection and month-over-month trend analysis

Moment (Startup) | *React Native, Neo4j, REST APIs*

- Designed and deployed a UIUC-specific event recommendation app with 600+ student downloads
